

# Massivit 3D Printing Systems

*LARGE-SCALE,  
FAST 3D PRINTING*

**MASSIVIT**

# Large, Custom Manufacturing at Unprecedented Speed

Massivit 3D printing systems empower manufacturers and service providers to expedite their lead times with unique Gel Dispensing Printing (GDP) technology.

Installed base  
across 40+ countries

Serving a range of industries:

AUTOMOTIVE

EDUCATION & RESEARCH

ARCHITECTURE

SCENIC FABRICATION

VISUAL COMMUNICATION

MARINE RAIL

### 30x faster

Produce full-scale prototypes, and parts within a matter of hours, instead of days or weeks. Dual printing heads allow you to create 2 models simultaneously with 2 different materials. Watch your parts instantly cure during printing, providing ready parts straight off the printer.

### Full-scale prototypes, molds, parts

Print a single part with a build volume of 145cm x 111cm x 180cm. Eradicate time wasted on producing and joining numerous small parts.

### Cost-effective, waste-free

Eliminate the mess, waste, and storage requirements associated with CNC machining and manual labor. Also, unlike legacy 3D printers, Massivit 3D technology prints with practically no support structures.

### Complex forms & undercuts

Easily create large, complex forms and undercuts that are unattainable with other technologies. Produce symmetrical parts with precision thanks to automated slicing software algorithms.

# A Range of Products to Suit Your Needs

	<b>MASSIVIT</b> 1800	<b>MASSIVIT</b> 1800PRO	<b>MASSIVIT</b> 5000	<b>MASSIVIT</b> 5000MAX
No. of printing heads	1 (Not upgradable)	1 or 2, with option to upgrade	2 printing heads	2 printing heads
Unprecedented printing speed	300mm/sec linear speed. 35cm/13.7" on Z axis per hour. (Printing speed for 1-meter diameter cylinder)			

Experience unprecedented production speed for full-scale prototypes, molds, and parts. Massivit 3D printing systems comprise robust, large-volume hardware, easy, live monitoring via internal cameras and computer vision, user-friendly software, advanced slicing algorithms, and a range of photo polymer materials.

**Massivit 3D Printing Technologies Ltd.** ([www.massivit3D.com](http://www.massivit3D.com)) is a leading provider of large-scale 3D printing systems for the Automotive, Marine, Rail, Architecture, Energy, Entertainment, and Education industries. Backed by 50 live patent assets, the company's Gel Dispensing Printing (GDP) technology empowers manufacturers, fabricators, and service providers to produce full-scale prototypes, molds and parts at unprecedented speed.

Founded in 2013 by a team of 3D printing and 2D printing experts, Massivit 3D is headquartered in Lod, Israel and provides its customers across 40 countries with comprehensive services via an extensive dealer network.
