Dear Sir/Madam,

**Re: Signing of a strategic cooperation agreement with SIKA –
a materials manufacturer**

The company is pleased to announce that, following signing the memorandum of understanding with Sika Deutschland GmbH ("SIKA") (as detailed in the report dated March 3, 2024, reference number 2024-01-021339), the company has signed a strategic cooperation agreement with SIKA. Under this agreement, SIKA's materials will be printed for the first time on the company's Massivit 10000 3D printer and will be marketed under joint branding.

The agreement outlines the cooperation between the companies, regulating the joint branding, production, supply, and sale of printing materials. It stipulates, among other things, that:

- Massivit will sell & market the co-branded materials to its Massivit printers.
- The printing materials will be branded and marketed under the names. SikaBiresin®CIM and MASSIVIT.
- The printers using these printing materials will be branded with the logo "Powered by SikaBiresin®".

The company estimates that the cooperation with SIKA will lead to an increase in new potential customers, greater use of its printers, and higher consumption of printing materials.

Additionally, this collaboration enhances the company's potential to penetrate new markets through the diverse materials available from SIKA.

The sale of printing materials under joint branding will begin during the second half of 2024.

The company's assessments regarding the potential increase in the number of customers, printer usage, consumption of printing materials, and new market penetration are forward-looking statements as defined in the Securities Law, 1968. There is no certainty regarding the realization of these forward-looking statements. They may materialize partially, wholly, differently, or not at all, and potentially in a manner significantly different from what was predicted. This is due to factors that cannot be assessed in advance and/or are beyond the company's control, including developments arising from the " Swords of Iron " war and its implications on the company and its suppliers. These factors may delay or impair the company's ability to implement its plans and forecasts and affect the realization of some or

all the risk factors characterizing the company's activities, as detailed in its ongoing and periodic reports.

Best Regard,

Massivit 3D Printing Technologies Ltd
